DETAILED ACTION

Allowable Subject Matter

Claims 40-71 are allowed.

The following is an examiner's statement of reasons for allowance: the combination of elements including an impeller, a plurality of magnets, each magnet disposed within one of the blades of the impeller, wherein an axis of magnetization of the magnets is substantially parallel to an impeller axis of rotation, was not found in the prior art search.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sipin, 5,405,251, discloses a centrifugal pump which has an impeller and a magnetic drive.
